"Words From The Commodore"
Commodore- John Guess

The season is under way with the completion of the Geneva Cruise this past weekend. Fun was had by all who attended. I want to thank the bridge officers for the great job they've been doing as well as the members that have stepped up and helped with the grounds and club house. We still have some projects available for work hours, if you are interested please approach any bridge officer for details. There was an additional leak discovered in the dockside water system two weeks ago that has been repaired. Thanks go out to Vice Chairman Trustee Joe Ciliberto for arranging the repair with minimal cost to the club. The gate also was down for repairs recently. Thank you P/C Trustee Don Connerton for arranging its repair. We will be putting out the open house sign at different times throughout the season, if any member knows of someone who might be interested in joining West Channel please invite them down to the club for a tour. Also, any member with an idea for attracting new members or promoting the club to the boating community please bring it to any member of the board. I have already been approached by members with several ideas, all of which will be discussed with the board. I want to remind everyone that the Pool Party is this Saturday starting at 2PM. Please bring a dish to share and be prepared to have fun.

Coming Soon.... Regatta 2010

"Clubhouse Comments"
Vice Commodore- Mike Piunno

I would like to thank the Nova's and the Jackson's who have had their turn with the house cleaning. The house is looking very good. Thanks for your effort. Thanks to John Orlosky for power washing the deck and cleaning the club house screens. If you see people on the grounds that you don't recognize, ask who they are and what they are doing at West Channel. Should the gate be closed on weekends too? FYI - The refrigerator in the kitchen was out of order and has been repaired. Thanks to Mark DiDonato for the fast service in repairing this. Projects for work hours; shower doors need painting, screen needs to be installed over the outside a furnace vent.
