Words From The Commodore
Commodore- Glenn Linke

Wow! What a great event took place October 17th. The big boy /comedy night was a great party. Everyone one that attended had awesome night. The final numbers are not in but, I know it was a profitable night. Thanks to all the WCYC- Blue Gavel members who participated and to the members who helped out with a party that will surely be repeated in the future!!! The freezer in the kitchen totally thawed because of a tripped breaker from the power washer and everything had to be thrown out. I would like to thank R/C Don and Marion Connerton for what was surely a nasty cleanup job. The clambake was a fun party and I would like to thank V/C John & Stephanie Guess, Fleet Captain Joe Lucas and all the members who put in their usual hard work to make this function the big event that it is. Thanks to everyone who attended, I hope you had as much fun as we did. Our next event scheduled for November 20th, is the chili-cookoff social at 7:00 pm. Bring your best chili recipe to be judged by fellow members. If you do not plan to bring any chili, just bring a appetizer or desert to share. The bar will be open and music provided. This event is open to all fellow clubs. Come out and enjoy a nice relaxing night with fellow members. At our last meeting a vote was taken to replace the satellite TV Dish that we lost the use of in August. Membership voted to go ahead and replace the service. This will happen shortly.

See you around the club!

Clubhouse Comments
Vice Commodore- John Guess

As we come to the end of the boating season I want to thank everyone that helped with the house this month and this past summer, all of your efforts were greatly appreciated. Also many thanks go out to PC/RC Don and Marion Connerton for cleaning up the freezer after the recent problem with the pressure washer that shut down the power to part of the club house this past week. Please make sure that you plug the washer into one of the outside outlets when using it. Instead of closing the house this winter it has been decided that we will insulate the sliding doors and take some additional measures to make the club house more energy efficient. If anyone has any ideas along these lines please let me know.

Happy Halloween
